

CREATING A CLEANER, SAFER, HEALTHIER WORLD.

EQUIPMENT

# Scrubber

Performance of a scrubber with the mobility of a mop

# Change the way you think about cleaning...

## meet the i-mop

Over 70% of floors are still cleaned with a mop & bucket. It is time to think differently about cleaning. Mop & buckets are highly maneuverable however they have many issues:

- Extremely labor intensive
- Primarily spread dirt around instead of removing
- Pose slip & fall risks due to wet floors

**The patented i-mop combines the maneuverability of the mop with the performance of a traditional scrubber. The i-mop:**

- greatly reduces labor costs, up to 10 times faster than a mop & bucket
- dramatically reduces water & chemical consumption
- delivers extremely clean floors with high mechanical agitation
- leaves nearly instantaneous dry floors with water recovery

**The i-mop was designed to:**

- work in tight spaces and underneath obstacles with its 360 degree handle
- have unlimited mobility with a foldable scrub deck & transport wheels, light enough to pick up
- be simple with easy & intuitive controls for first time scrubber operators

## Dual, counter rotating brushes

### Twin Brushes

Counter-rotation of twin brushes pushes solution toward center, rather than splashing off to the side of the machine.

### Unique Brush Design

Channels that constantly push solution towards – not away from center. Plus, concentrically stepped bristles trap fluid and prevent splashing.

### Squeegee System Design

Placement of squeegee under weight of equipment creates pressure against uneven floor surfaces for better fluid recapture.

### Squeegee Location

Location of squeegee immediately behind brushes (vs. behind wheels) retrieves fluid before its fans out to sides.

### Simple, intuitive controls

Obvious operation – easy to train

### Easy swivel operation – even with one hand

No balancing act, pushing or straining— as easy to operate as a mop

### Detachable tanks for cleaning solution & recovery water

Easy to replace or change clean solution on the fly, easy to empty recovery water in any sink, virtually no down time

### Heavy-duty hinge for 360° steering

Highly maneuverable in small spaces around obstacles and under furniture

### Rechargeable modular battery packs

Continuous run-time by swapping out and recharging with an extra set of batteries

### Powerful 350 RPM motors

Up to twice the speed of many conventional disk scrubbers

### Easy transport wheels

Easily transportable between different areas, levels and buildings

### Full-size heavy-duty deck

High productivity – i-mop XL cleans & dries 1,000 sq ft of obstructed space in less than 5 minutes

### Low profile & folding design

Fits under furniture and counters and gets into tight spaces. Deck folds for narrow storage.

## tanks

Extra quick-connect color-coded tanks for multiple cleaning solutions can be carried.

## pads

A full range of pads to handle a wide variety of soil types, floor types and cleaning applications.

## batteries & chargers

i-mop's lightweight lithium-ion batteries are part of the technology that makes i-mop small enough to get in tight spaces and still be easily transportable up and down stairs and in a car. Extra batteries allow the i-mop to run 24/7. Optional wall chargers are available. Get longer runtime (90 minutes) on the i-mop XL with gray batteries.

## brushes & collars

A variety of brushes are available for your i-mop, including soft, medium, and hard bristles. Color-coded brush collars in HACCP colors are also available.
